To make these understandings more democratic and accountable, the scholarly community needs to make data, and the skills and knowledge to make sense of data, more broadly accessible. *Networking Archaeological Data and Communities* builds on our achievements at [The Alexandria Archive Institute / Open Context](#) (AAI/OC) in archaeological data publishing and data literacy instruction by providing professional development opportunities for archaeologists who represent and serve diverse communities.

Format In virtual and in-person meetings, participants in *Networking Archaeological Data and Communities* will bridge theoretical and practical aspects of data. The program is organized around four semesters devoted to specific themes: *The Data Management Lifecycle* (Spring 2023), *Data for Professional Communication* (Fall 2023), *Data for Diverse Publics* (Spring 2024), and *Data for the*

Archivists and Historians

Digital history and archiving are thriving, but the increasing volume of digitized and "born digital" materials for historical research also presents new challenges for archivists and historians. Typically, the only way to explore these resources has been through keyword searching. More direct access to the data creates tremendous new research opportunities, but the barriers to entry can seem daunting.

This NEH-funded program will offer practical training for historians and archivists in processing and analyzing textual data. Participants in the Archiving Digital Records workshop, designed for archivists, will
